

Disease Information - Document1

Disease Name: Malaria

Description: Malaria is a serious and sometimes fatal disease caused by a parasite that commonly infects a certain type of mosquito which feeds on humans. People who get malaria are typically very sick with high fevers, shaking chills, and flu-like illness.

ICD Code: B54

Disease Name: Tuberculosis

Description: Tuberculosis (TB) is a potentially serious infectious disease that mainly affects your lungs. The bacteria that cause tuberculosis are spread from person to person through tiny droplets released into the air via coughs and sneezes.

ICD Code: A15.0

Disease Name: Pneumonia

Description: Pneumonia is an infection that inflames air sacs in one or both lungs. The air sacs may fill with fluid or pus (purulent material), causing cough with phlegm or pus, fever, chills, and difficulty breathing.

ICD Code: J18.9

Disease Name: Diabetes Mellitus Type 2

Description: Type 2 diabetes is a chronic condition that affects the way your body processes blood sugar (glucose). With type 2 diabetes, your body either doesn't produce enough insulin, or it resists insulin.

ICD Code: E11.9

Disease Name: Hypertension

Description: Hypertension, or high blood pressure, is a common condition in which the long-term force of the blood against your artery walls is high enough that it may eventually cause health problems, such as heart disease.

ICD Code: I10

Disease Name: Asthma

Description: Asthma is a chronic lung disease that inflames and narrows the airways. Asthma causes recurring periods of wheezing (a whistling sound when you breathe), chest tightness, shortness of breath, and coughing.

ICD Code: J45.909

Disease Name: Alzheimer's Disease

Description: Alzheimer's disease is a progressive neurological disorder that causes the brain to shrink and brain cells to die. It's the most common cause of dementia — a continuous decline in thinking, behavioral and social skills that affects a person's ability to function independently.

ICD Code: G30.9

Disease Name: Parkinson's Disease

Description: Parkinson's disease is a progressive disorder that affects the nervous system and the parts of the body controlled by the nerves. Symptoms start gradually. The first symptom may be a barely noticeable tremor in just one limb.

ICD Code: G20

Disease Name: Osteoarthritis

Description: Osteoarthritis is the most common form of arthritis, affecting millions of people worldwide. It occurs when the protective cartilage that cushions the ends of your bones wears down over time.

ICD Code: M19.90

Disease Name: Migraine

Description: A migraine is a headache that can cause severe throbbing pain or a pulsing sensation, usually on one side of the head. It's often accompanied by nausea, vomiting, and extreme sensitivity to light and sound.

ICD Code: G43.909
